Weight:	150kg netto

Tromsø bathtub details:

Tromsø freestanding bathtub in mat Acovi solid surface 135cm. The bathtub comes with drain cover in the same Acovi solid surface. Acovi is a very hygienic product without any open pores where dirt can gather. It is therefore easy to maintain with daily cleaning, where the best result is achieved with washing-up liquid and a little vinegar to remove the limestone. Use Copenhagen Bath Stone sealer so water and limestone do not tie easy to the material. The bathtub is mounted directly into the floor. The tub is delivered with waste, trap and hose.
